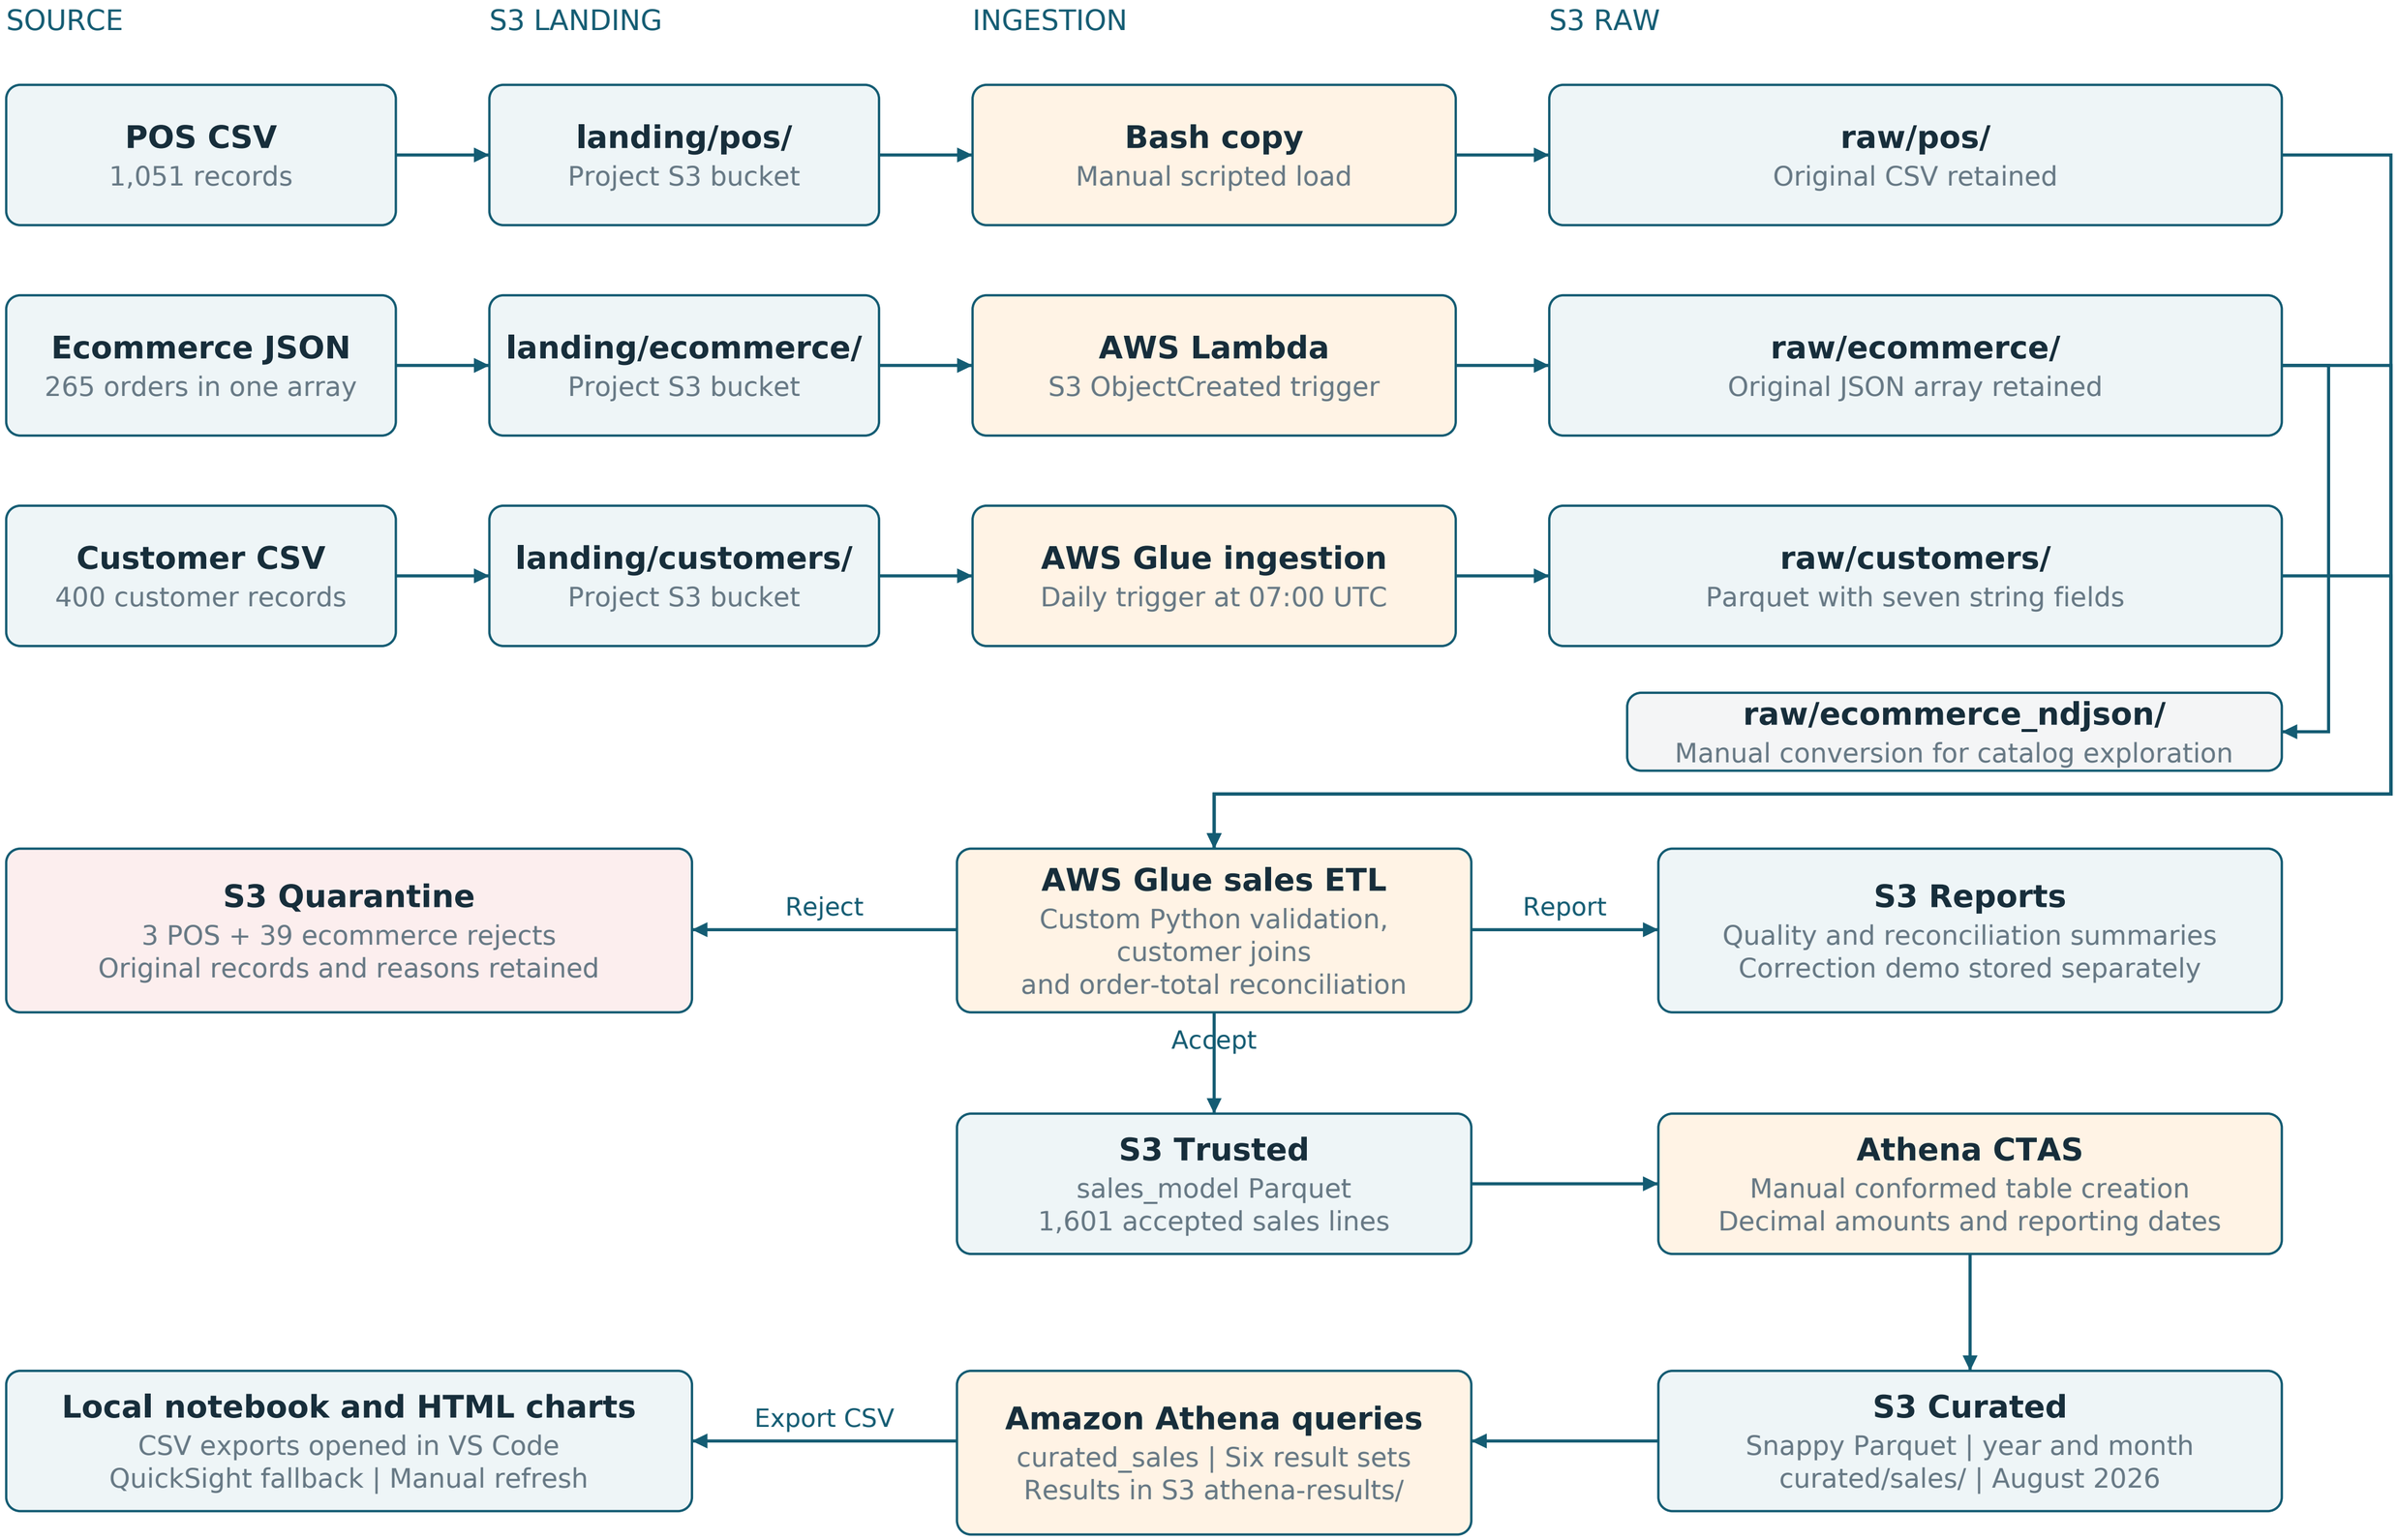
Thornquist Outfitters data flow

Verified deployment on 22 October 2026 | us-east-1 | Synthetic inputs | Solid arrows show data movement



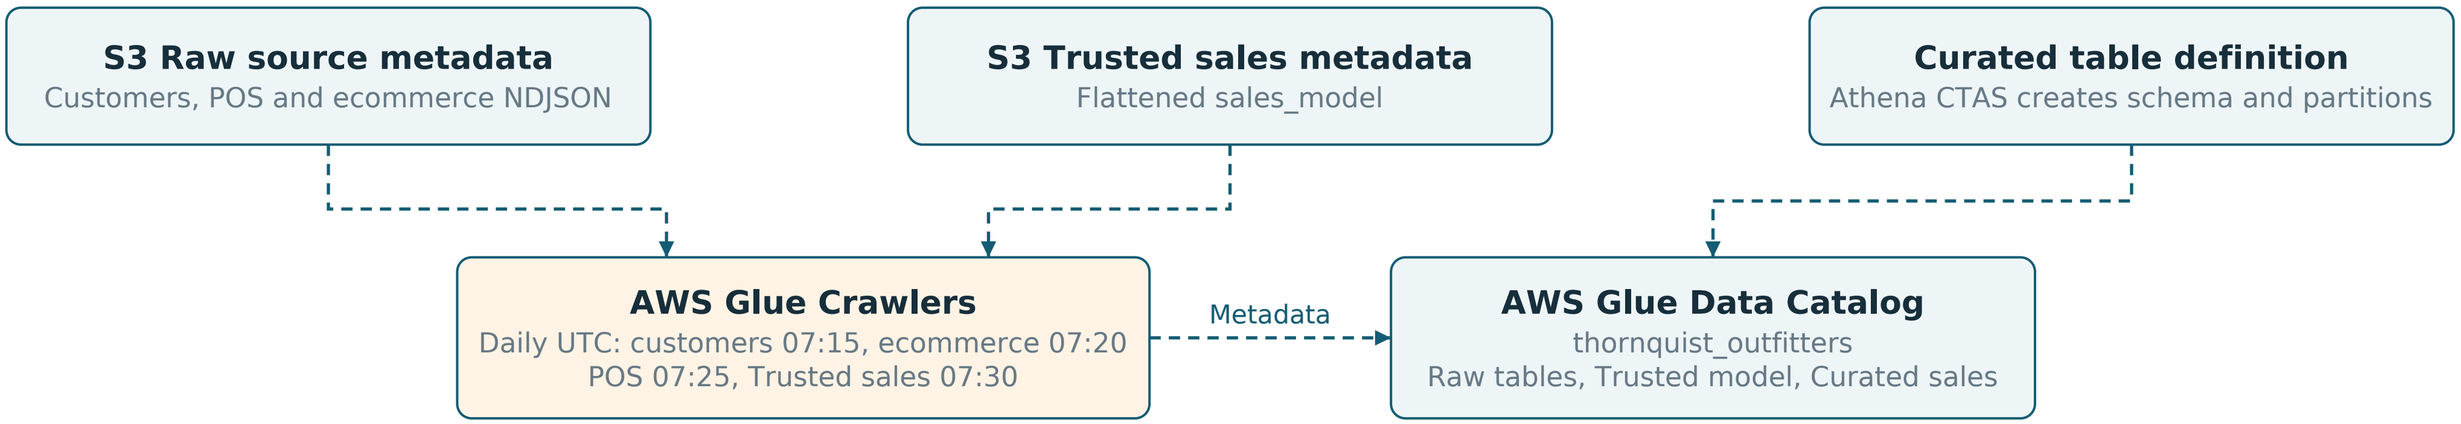
Accepted sales: 320,570.35 source units | POS 214,561.78 | Ecommerce 106,008.57

Bucket: thornquist-data-lake-2026102 | Catalog, monitoring and governance relationships appear on page 2.

Thornquist Outfitters operations and governance

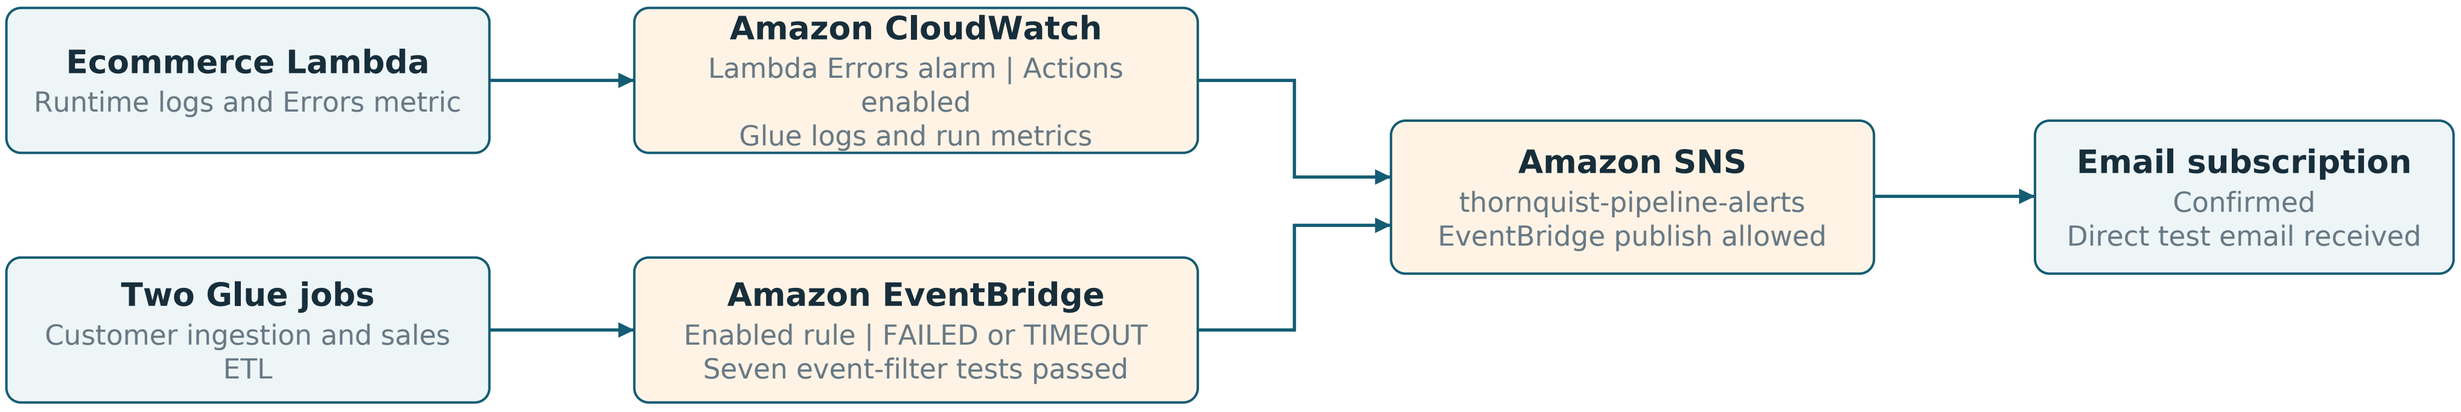
Configured controls and their verification limits | Dashed boxes identify proposed access controls

CATALOG AND QUERY METADATA



Catalog schedules are independent timers. Scheduled execution and the full automatic refresh chain are not yet demonstrated.

MONITORING AND NOTIFICATIONS



Filtering and SNS email delivery were tested separately. Real job-failure-to-email and alarm-to-email paths remain untested.

ACCESS AND AUDIT

AWS IAM execution roles
Existing LabRole used by pipeline
IAM policy inspection restricted

Amazon S3 protection
Block Public Access On | SSE-S3 default
HTTPS deny policy deployed

Lake Formation analyst access
Proposed Curated SELECT only
ListPermissions denied in lab

AWS CloudTrail
Management Event history verified
No dedicated trail or object audit proven

Proposed analyst IAM and bucket policies
Dedicated workgroup and cross-zone restrictions are design artifacts, not deployed controls
